

Gabriel Cisneros

Long Beach, CA | GabrielCee81@gmail.com | <https://www.linkedin.com/in/gabe-cisneros>

SUMMARY

Senior Software Engineer with 7+ years of experience delivering scalable, user-focused web applications. Expert in React, Next.js, and microservice architecture. Proven leader in driving projects from concept to launch.

TECHNICAL SKILLS

Programing Languages: TypeScript, JavaScript, Elixir, Python, Ruby, Java, C, C++

Frameworks: Next.js, Phoenix, Rails, Django, Flask, Express, gRPC

Web Technologies: React, HTML/CSS, GraphQL, Feature Flags, Apollo Client, Node, Chakra UI, Sass, JWT, Bootstrap

Database Systems: PostgreSQL, AWS S3, AWS DynamoDB (noSQL)

EXPERIENCE

The RealReal

Remote

Senior Full Stack Engineer

Dec 2021 - Current

Full Stack Engineer

Nov 2020 - Dec 2021

- Lead the Admin Price Estimator project which created an internal tool for TRR Representatives to use on their phone during in-person appointments to give the seller real-time price estimates from our machine learning pricing service to improve seller confidence.
- Lead the integration of our seller referral system with a third-party promotion engine using an event-driven architecture, resulting in increased supply.
- Created architecture plans for the projects I lead and carried them through a feedback process with the engineering team.
- Assisted in integrating our New Commission Structure project, which was estimated to \$12M in EBITA, by creating a handoff of our old legacy code to a new gRPC app with an extreme importance in maintaining stable payouts.
- Assisted in integrating Plaid Link to streamline the Direct Deposit experience which led to a record high of 57% Direct Deposit payouts.
- Lead the migration of multiple legacy seller pages to a new Next.js app which include the Seller Dashboard, Payment Preferences, and Seller Commissions.
- Lead the adoption of Next's Incremental Static Regeneration feature for Prismic (CMS) pages which improved Lighthouse Performance scores by 7 points on average.
- Help team growth by conducting interviews, mentoring engineers, and being active in our JAMstack Guild.

H.O.M.E.

Remote

Freelance Full Stack Engineer

April 2020 - Nov 2020

- Designed and developed a video course web application with both admin and user facing pages.
- Communicated with client on a weekly basis to review progress and create achievable deliverables.
- Implemented Redux-like state with React's Context and Reducer hooks to keep multiple video angles in sync.

Conventus

San Francisco, CA

Full Stack Engineer

May 2019 - June 2020

- Implemented a socket.io, Node microservice to enable real-time loan editing which prevented hours of work lost from employees overwriting each other's changes.
- Implemented a price forecast chart powered by HouseCanary and Zillow APIs to improve risk visibility.
- Helped develop an internal loan management application used by the entire company with Django and React.

JAKKS Pacific

Santa Monica, CA

Full Stack Developer Intern

May 2018 - Aug 2018

Contributed in improving the company's intranet php website used by 700+ employees by engaging in scrum meetings, creating solutions upon ticket submission, and building automated Selenium frontend tests.

PROJECTS

EEG Processing Flask App (Capstone Project)

Jan 2019 - May 2019

- Built a Flask web application for researchers to upload EEG files and download the processed results.
- Built a backend for file pre-processing, optimized the Python processing script, and utilized AWS S3 Bucket for cloud storage.

EDUCATION

University of San Francisco

San Francisco, CA

Bachelor of Science in Computer Science

Aug 2015 - May 2019

- Cumulative GPA: 3.64; **Major GPA: 3.77 / 4.0**
- Relevant Courses: Data Structures & Algorithms, Software Development, Database Systems, Web Development, Parallel Programming, Computer Architecture, Operating Systems and Language Paradigms
